

SUPERFAN

INTERACTIVE
EXPERIENCE

BRAINSTORM

come up with three different ideas of themes + interactive features

PHASE 0

Idea 1: Tyler, The Creator Discography

Theme

Have a theme of all of Tyler's albums and pick a song that I feel best encapsulates it.

Interactive JS Feature #1

When you click on the album cover, a sound bite starts playing and gives you a background of the song, or MV starts playing.

Interactive JS Feature #2

Once clicked, the image would either change to his style during that period or go to a MV.

Interactive JS Feature #3

Your explanation here...

Idea 2: Shoe drop

Theme

You have to enter a password to log onto the site, and once you're on it, it gives you a breakdown of 3 pairs of Nike/Jordan shoes

Interactive JS Feature #1

There will be a screen where you have to enter a password to get onto the site and click on things.

Interactive JS Feature #2

You can click on each of the 3-6 shoes on the site and get some brief info and pricing of them.

Interactive JS Feature #3

Your explanation here...

Idea 3: The World Of Music

Theme

It will show 5 songs at once, with a reroll function at the bottom middle of the screen that will bring up new songs. You will be able to click on each song and get a little bit of history on it (includes features and EPs).

Interactive JS Feature #1

Interactive JS Feature #2

Interactive JS Feature #3

Reroll Button: Click to change what songs appear on screen.

Popup window: Allows people to click on the song and see what the song is from and extra info.

EVALUATE

think about the good and bad for each idea then choose one

PHASE 1

Evaluate + Choose Your Idea

	Pros	Cons
Idea 1: TC Discography	<ul style="list-style-type: none">All album covers and audio easily accessibleSimple div layout & breakpoint config.	<ul style="list-style-type: none">Hard time making layout + adding soundbyte workIf it breaks or doesn't work correctly, it may ruin the user experience
Idea 2: Shoe Drop	<ul style="list-style-type: none">Easy to access pictures of shoesInteractive and fun to play withEasy to make look professional	<ul style="list-style-type: none">May be too boring or look simple to the userIf password feature breaks, whole site will not work
Idea 3: World Of Music	<ul style="list-style-type: none">Highly interactive and fun to useDifferent songs each timeLots of design freedom w/ layoutAlbums + music easily available	<ul style="list-style-type: none">Hard time making layout + adding soundbyte workHave to learn how to add text boxes after you click on the album.

CONTENT

gather and edit essential content for your site

PHASE 2

Background

PIXLR

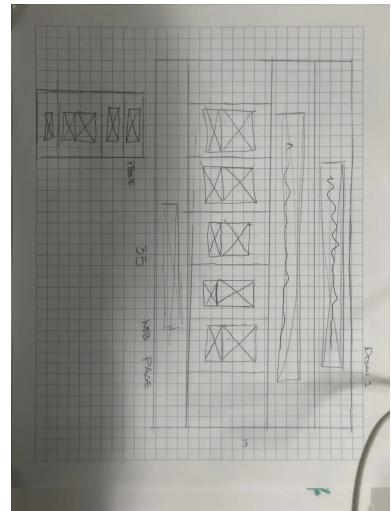

DESIGN

create three possible responsive designs for your chosen idea

PHASE 3

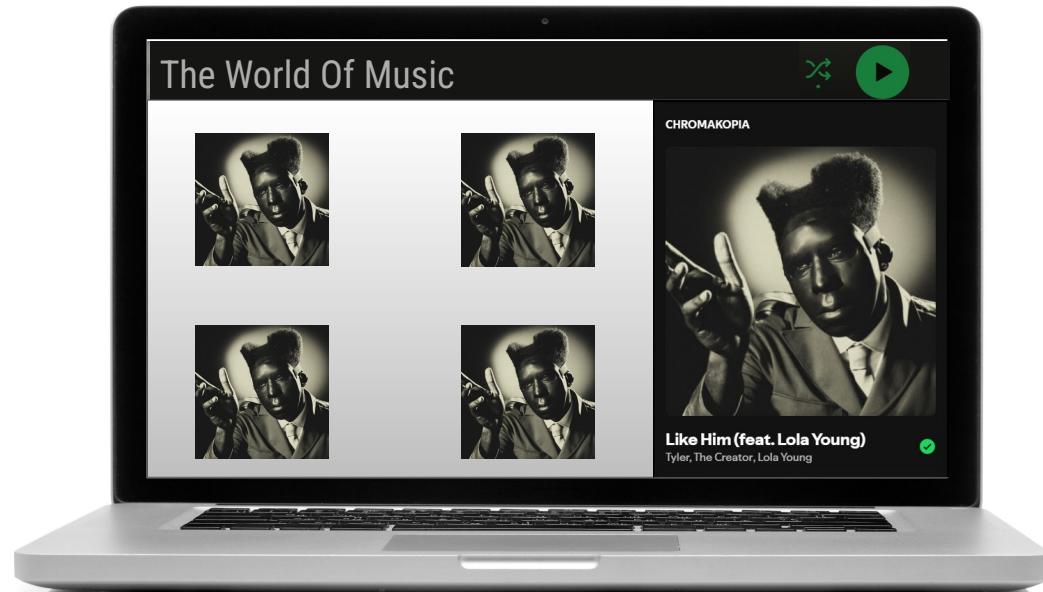

[Photos of Design + Annotated Wireframe](#)

MOCKUP

choose your final layout and create a digital mockup

PHASE 4

ANNOTATE

add explanations, colors, percentages, and display properties + draw your dom

PHASE 5

[Photos of Annotated Wireframe HTML + CSS \(slides 4-5\)](#)

BUILD

create your desktop divs using html and css then make it responsive

PHASE 6

The screenshot shows a browser window with developer tools open. The main content area displays a grid of colored squares (orange, red, blue, green, purple, teal, pink) arranged in a 3x3 pattern. Below the grid is a button labeled "Open Sandbox". The developer tools sidebar on the right shows the DOM tree:

```
<!DOCTYPE html>
<html>
  <head>
    </head>
  <body>
    <div class="grid">
      <div class="row-top">
        <div class="col-left orange" onclick="moveDiv(this)"></div>
        <div class="col-middle blue" onclick="moveDiv(this)"></div>
        <div class="col-right green" onclick="moveDiv(this)"></div>
      </div>
      <div class="row-middle">
        <div class="col-left red" onclick="moveDiv(this)"></div>
        <div class="col-middle purple" onclick="moveDiv(this)"></div>
        <div class="col-right teal" onclick="moveDiv(this)"></div>
      </div>
      <div class="row-bottom">
        <div class="col-left blue" onclick="moveDiv(this)"></div>
        <div class="col-middle pink" onclick="moveDiv(this)"></div>
        <div class="col-right orange" onclick="moveDiv(this)"></div>
      </div>
    </div>
    <script>crossOrigin type="text/javascript" src="https://codesandbox.io/static/cdn/watermark-button.ebd4a9b.js"</script>
  </body>
</html>
```

The "Elements" tab is selected in the toolbar. The bottom status bar shows "html body div-grid div-bottom-left div-row-top div-blue". The bottom right corner of the browser window has a watermark that says "CODESANDBOX".
